Multifunctional printer

## Highly productive colour to help improve your business

Canon's most advanced office multifunctional printer to date, the flagship iRC5185i allows businesses to easily produce colour documents cost-effectively and securely - without the expense of outsourcing. Featuring superb finishing, integrated document accounting, and numerous user-friendly innovations, it helps your business achieve maximum productivity every working day.

### High quality, high productivity

- Highly productive print performance with 51 pages per minute for colour and black and white.
- Innovative "one pass" scanning means both sides are scanned simultaneously for incredible speeds of 100 impressions per minute (300 dpi).
- Create quality colour documents at 1200 dpi with full support for PCL 6.
- Add impact to reports, presentations and marketing materials with professional finishing facilities including stapling, hole punching and booklet making.

### Added control, extra versatility

- Supports the latest technologies, such as next generation "IP v6", and Web Services on Devices (WSD) on Microsoft Windows Vista, allowing features such as "network plug and play" and "job completion notification".

- Advanced security ensures compliance with Common Criteria (ISO15408) - the global standard for IT security. Features include secure watermark, encrypted PDF, personal mailboxes and secure printing.
- The new Access Management System (AMS) featured within uniFLOW Output Manager (UFOM) allows IT managers to create access profiles to devices functions (colour printing, fax, scan) for single users, groups, departments enabling organisations to control costs, and security.
- Canon's iWMC ensures simple set-up and ongoing management with time-saving features such as auto-problem notification for administrators e.g. low paper or toner.
