Information at your fingertips

The intelligent communication functions of the iR1610F and the iR2010F speed up and simplify the way you distribute documents, saving you time and money. Intelligent sending allows documents to be sent to multiple destinations in a single operation, or distributes them

to a specific file or e-mail address, while Internet fax harnesses the power of the Internet to reduce communication costs. With intelligent receiving, the system routes all incoming information so that it can be shared by every authorised user on the network. The iR1610F and the iR2010F always ensure that the right information gets to the right people at exactly the right time.

SIMPLE AND EFFECTIVE

An intuitive control panel ensures every task is simple to perform. With the network printing option, this simplicity is extended to all connected users via the remote user interface, which allows you to manage and control your jobs direct from desktop PCs. Canon also offers software solutions that provide powerful applications for workflow, print management and full document accounting. Now even the smallest enterprises can profit from big office performance.
